ILTA: Blackmer – booth #223

Blackmer® to Display Energy-Efficient Transfer Technologies in Booth 223 at ILTA

Blackmer®, a world-class innovator in pump and compressor technologies, announces that it will exhibit in booth 223 at the upcoming 29th Annual International Operating Conference & Trade Show hosted by the International Liquid Terminals Association. The ILTA event will take place from June 8-10, 2009, in Houston, Texas, USA.

Blackmer is a global leader in the design and manufacture of high quality flow technologies, including sliding vane positive displacement pumps and reciprocating oil-free gas compressors for transfer of liquid and gas products. The Company's pumps and compressors are used worldwide in a variety of industries including LPG, Chemical and Industrial Processing, Refined Hydrocarbons, Food & Sanitary, Dry Bulk, Military and the Mobile Transport market.

Blackmer is an operating company within Dover Corporation's Pump Solutions Group (PSG™). Formed by its parent company Dover Corporation (DOV: NYSE) in 2008, PSG combines six leading pump manufacturers into a cohesive pump organization with a broad array of transfer technologies. In addition to Blackmer, PSG will also have products from Wilden® (the world's largest manufacturer of Air Operated Double Diaphragm Pumps) and Griswold™ (an ANSI centrifugal pump manufacturer) that are ideal for use in numerous applications within the terminals market.

Specifically, Blackmer will feature its Sliding Vane Pumps and Heavy-Duty Compressors at the ILTA show. Blackmer vane pumps are designed for high capacity transfer, top or bottom loading/unloading and blending at the rack, or for barge, ship, UST and terminal transfers. Utilizing Blackmer's unique sliding vane design, these positive displacement rotary pumps offer the best combined characteristics of sustained high level performance, energy efficiency, trouble-free operation and low maintenance cost. Blackmer's oil-free HD process compressors provide quiet, efficient transfer of a wide range of liquefied gases. They also can perform vapor recovery to ensure you have the most complete product transfer possible.

Blackmer is an operating company within Dover Corporation's Pump Solutions Group (PSG™). Formed by its parent company Dover Corporation (DOV: NYSE) in 2008, PSG combines the following operating companies into a cohesive pump organization with a broad array of pump technologies: Wilden®, the world's largest manufacturer of AODDPs; Blackmer®, the largest global manufacturer of sliding vane pumps; Mouvex-Blackmer™, a manufacturer of eccentric disc pumps; Griswold™, an ANSI centrifugal pump manufacturer; Almatec®, a premier manufacturer of air-operated diaphragm pumps specializing in 100%-machined plastic pumps; and Neptune™, a producer of chemical metering pumps, mixers and chemical feed systems.
